

## 第 7 回国際アジア地震学連合総会

松 浦 律 子\* 石 川 有 三\*\* 松 田 時 彦\*

**The 7<sup>th</sup> General Assembly of Asian Seismological Commission**

Ritsuko S. MATSU'URA\*, Yuzo ISHIKAWA\*\* and Tokihiko MATSUDA\*

### Abstract

Devastating earthquakes often cause serious disasters in Asia. In 1996, the Asian Seismological Commission (ASC) was established in order to reduce earthquake disasters in Asia through sharing our knowledge of seismology and experience on earthquakes, and by bridging science and technology, research and application, domestic efforts and international collaboration, and Asia-Pacific and the world. The 7<sup>th</sup> general assembly of ASC was held in Tsukuba in November 2008. It was the first ASC assembly to be held in Japan. We express our sincere appreciation to Tokyo Geographical Society for supporting this meeting.

**Key words** : ASC2008, Asian Seismological Commission, Earthquake Disaster Prevention, Seismology, International Contribution, International Exchange

キーワード : アジア地震学連合総会つくば大会, 地震防災, 地震学, 国際貢献, 国際交流
